

Conservation Officer: Pre-Application Response

Consultee response · dated 2026-05-19

- 1.** The three warehouses are Grade II listed and form part of the Harbourside Conservation Area. The principle of residential conversion is supported as a viable use that secures the long-term future of the buildings.
- 2.** Concerns: the proposed rooftop extension on Warehouse 2 would harm the roofline and is not supported. Retention of the cast iron columns, timber floor structure and loading doors is expected. New window openings on the quay elevation will not be accepted.
- 3.** Listed Building Consent will be needed alongside the planning application. A Heritage Statement and a schedule of works are required.
