

Pre-Application Advice: Land at Mill Pond Meadows

Officer report · dated 2026-04-09

- 1. Principle:** the site is allocated for approximately 150 dwellings in the Local Plan Update (policy SS12). Development of the allocation is supported in principle subject to the requirements of the policy, including a Suitable Alternative Natural Greenspace (SANG) contribution and a primary school contribution.
- 2. Housing mix:** 40% affordable (70:30 social rent to shared ownership), a minimum of 10% as M4(3) wheelchair accessible. Density of 31 dph is acceptable; officers would accept up to 34 dph subject to landscape impact.
- 3. Concerns:** officers consider the proposed access from Mill Lane inadequate for 150 dwellings and advise that a second emergency access will be needed. The landscape officer is concerned about built form on the western ridge line.
- 4. Timescale:** an outline application is likely to be determined at committee in 13 to 16 months, given the scale and the need for a Section 106 agreement.
